TECHNICAL SPECIFICATIONS FOR BILL PROCESSING

PURPOSE OF BILLING PROCESS

This process will log the pharmacy bills sent by the PBM electronically.

The PBM shall:

- The billing file shall have the correct naming convention and format.
- Encrypt the file using pgp encryption methodology.
- Transmit the data file weekly using SFTP or SSH connection.

NYSIF shall:

- Validate the file structure and reject back to PBM if the file structure is not correct.
 - 1.) There must be only one header record.
 - 2.) There must be only one footer record.
 - 3.) There must be at least one billing record.
 - 4.) There should not be any other records in the file other than header, footer, and billing/detail records.
 - 5.) The length of each record must be exactly 1500.
 - 6.) The header record processor id must match what NYSIF has in database.
 - 7.) The claim processor id must match the header record processor id
 - 8.) All claim numbers must exist in the NYSIF database.
 - 9.) Total Claim Amt calculated must equal the Total Claim amount in the footer.
 - 10.) Total Billed Amt calculated must equal the Total Billed Amt in the footer.
 - 11.) Total Admin Amt calculated must equal the Total Admin amount in the footer.
